

Writing Reports and Tables to a File

School of Information Studies
Syracuse University

Creating Output

Saving output

Creating tables

Using Transformed data

Writing Text Files

File write

- Open a file to write output to
- Write the line to the file
- Add newline to the end of the string
- Close the file

| Creating Intermediate Tables

Data cleaned from original data

`csv.writer ()` creates csv files

pandas function – `pd.write_csv ()`
